Applicant's election of Group I, claims 1-25 in the reply filed on 11 October 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Volk et al. US 2005/0004774.

Volk et al. discloses a method of monitoring the fabrication of an IC on a wafer including generating a design using an EDA tool, wherein an indication of a site that is susceptible to defect, fabricating the IC on the wafer and applying a process monitoring tool to perform a measurement at the site, and determining the nature of the defect and its effect on the IC, using known techniques and apparatus (see fig. 4 and related text).
